

Getting started with KGeN Quest

From sign-up to your first recording

Set up your account, configure Minute Data and learn how to submit videos of everyday tasks for AI data collection.

MINUTE INVITATION / ORGANIZATION CODE

5TBCT4ZC

START WITH REGISTRATION

Independent guide with a referral link.

Start with the campaign

01 • Open the guide

Go to <https://kgenquests.com/> and select Sign up. The button takes you to external registration with a referral link; this website is an independent guide.

03 • Choose an opportunity

Find a campaign available for your country and profile. Open it, read the entire page and check its terms before joining.

Independent guide with a referral link.

02 • Create your account

Use a sign-in method available on the platform. If you choose Google, use the account you intend to keep. Save the email address you use.

04 • Read and watch the instructions

Review requirements, equipment and allowed activities. Watch the provided tutorials, including recording examples and app features.

Set up Minute Data

05 • Create partner access

Follow the partner access provided by the campaign and use the same email as your KGeN account. Check the account link before recording.

07 • Install Minute Data

Download from the official stores using the buttons on the last page. Sign in with the same email and check the code if the app asks for it again.

06 • Enter the code

Enter 5TBCT4ZC in the invitation or organization field when requested. Check the organization displayed and its linked campaign; its name may change.

08 • Complete enrollment

Return to the campaign and complete any pending steps. Check your partner email and read the terms before accepting. Registration does not guarantee available tasks.

MINUTE INVITATION / ORGANIZATION CODE

5TBCT4ZC

Prepare and record

09 • Prepare your equipment

Use a secure, compatible head mount as instructed. You do not need to buy from a specific seller. Test the camera, available storage and battery.

DEVICES: CHECK IN THE APP

This guide lists iPhone 12 to 17, excluding 16e/17e, and Samsung Galaxy S21 to S26, excluding FE models. Acceptance depends on the device, camera and campaign. Check in Minute before buying equipment.

10 • Select a task and record

In Minute, open Tasks, choose an available activity and read its instructions. Adjust the framing to show your hands and objects while performing the task.

Recording checklist

Follow the camera orientation required by the task. Use good lighting and natural movements. Show your hands when required. Avoid unauthorized people, screens, documents and personal information. Follow task duration and limits; do not artificially extend sessions.

Submit, track and check

11 • Submit and track

Check that recording has ended and upload is complete in Minute. Track review and approved hours in the campaign. Keep the date, task and session ID.

Uploaded does not mean approved

An uploaded video may still need review. Recorded, uploaded and approved hours may differ. If an error occurs, contact the support listed in your account; never share your password or verification code.

Payments and referrals

The Brazilian campaign advertises weekly PIX payments, subject to approval and processing. Check current rates, bonuses, limits and referral terms in your account. Other countries and campaigns may have different terms. This guide does not guarantee earnings or present income examples as promises.
